INDEPENDENT AUDITORS' REPORT

The Board of Directors Guam Telephone Authority:

We have audited the accompanying balance sheets of the Guam Telephone Authority, a component unit of the Government of Guam, (a public corporation) as of September 30, 2001 and 2000, and the related statements of operations and retained earnings and cash flows for the years then ended. These financial statements are the responsibility of the Authority's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the financial position of the Guam Telephone Authority as of September 30, 2001 and 2000, and the results of its operations and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

As discussed in note 8 to the financial statements, the Authority changed its method of accounting for nonexchange transactions to conform with Government Accounting Standards Board Statement No. 33 and has restated the 2000 financial statements to reflect the change.

Our audit of the financial statements for the years ended September 30, 2001 and 2000, was made for the purpose of expressing our opinion on the financial statements taken as a whole. The accompanying schedules on pages 14 and 15 are presented for purposes of additional analysis and are not a required part of the basic financial statements. These schedules are the responsibility of Guam Telephone Authority's management. Such information has been subjected to the auditing procedures applied in the audit of the financial statements and in our opinion, is fairly stated in all material respects, in relation to the basic financial statements taken as a whole.

In accordance with *Government Auditing Standards*, we have also issued our report dated April 30, 2002 on our consideration of Guam Telephone Authority's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grants. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be read in conjunction with this report in considering the results of our audit.

April 30, 2002, except for note 9 as to which the date is December 8, 2002

Cash and cash equivalents at end of the year \$	\$_	5,617,322 \$	13,495,589

Supplemental Schedule of Noncash Transactions:

The Authority recognized \$1,449,473 and \$1,330,906 of income through stock dividends from the Rural Utility Service in 2001 and 2000, respectively.

In 2001, the Authority recognized other income and a reduction of Retirement Fund deferred contributions (note 6).

See accompanying notes to financial statements.

Notes to Financial Statements September 30, 2001 and 2000

(1) Organization and Summary of Significant Accounting Policies

General

Guam Telephone Authority (Authority) was created by Public Law 12-44, pursuant to which the assets and liabilities of the telephone division of the Public Utility Agency of Guam (PUAG) were transferred to the Authority effective April 1, 1974. In 1991, a separate non-regulated "Cellular Operations" was created utilizing funds advanced by the Authority. As a Government of Guam agency, the Authority and its Cellular Operations are classified as a component unit of the Government of Guam for financial reporting purposes and, therefore, are not subject to taxes.

The Authority follows accounting policies prescribed or authorized by the Federal Communication Commission of the United States of America, as provided for in the indenture agreement with the United States Rural Utilities Service (RUS), Rural Telephone Bank (RTB), and Federal Financing Bank (FFB), and the Authority is subject to the regulations of the Public Utility Commission (PUC).

Because of the PUC rate-making process, certain differences arise in the application of generally accepted accounting principles between regulated and non-regulated businesses. Such differences mainly concern the time at which various items enter into the determination of net earnings in order to follow the principle of matching costs and revenues.

Basis of Accounting

The financial statements of the Authority have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) as applied to government units. Government Accounting Standards Board (GASB) Statement No. 20, "Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities that Use Proprietary Fund Accounting", requires that proprietary activities apply all applicable GASB pronouncements as well as Statements and Interpretations issued by the Financial Accounting Standards Board (FASB), Accounting Principles Board Opinions, and Accounting Research Bulletins of the Committee on Accounting Procedures issued on or before November 30, 1989. The Authority has implemented GASB 20 and elected not to apply FASB Statements and Interpretations issued after November 30, 1989.

Geographic Area of Customer Base

The Authority is the sole supplier of local telephone service within Guam. Overseas services are provided by Guam-based private telecommunications companies.

Property, Plant and Equipment

Property, plant and equipment is stated at cost. Cost of plant includes an allocation of overhead, including administrative expenses. The Authority also capitalizes the cost of debt funds during periods of construction of projects requiring more than one year to complete. The cost of plant retired or otherwise disposed of, net of sales proceeds plus removal cost, is charged to accumulated depreciation.

Depreciation is computed using the straight-line method over the estimated useful lives of the assets.

Notes to Financial Statements September 30, 2001 and 2000

(1) Organization and Summary of Significant Accounting Policies, Continued

Operating Revenues

Operating revenues consist primarily of subscriptions and other local charges and the Authority's share of overseas message tolls.

Rural Telephone Bank Stock

Rural Telephone Bank stock is issued based on the loan agreement between the Authority and RTB. The stock is carried at market value as quoted by RUS.

Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Vacation and Sick Leave

Vacation of not more than 480 hours vests and is accrued for each bi-weekly pay period in which an employee is in a pay status for the entire (10) ten days. Sick leave does not vest and is not accrued. The aggregate amount of the sick leave liability cannot be estimated.

Materials and Supplies

Materials and supplies are carried at the lower of cost (average pricing) or market net of a provision of \$292,999 and \$480,558 as of September 30, 2001 and 2000, respectively.

Cash and Cash Equivalents

For purposes of the balance sheets and the statements of cash flows, cash and cash equivalents include cash on hand, cash in banks, cash in money market funds and time certificates of deposit with original maturity dates of ninety days or less.

Reclassifications

Certain reclassifications have been made to the 2000 financial statements to conform to the 2001 presentation.

(2) Cash and Cash Equivalents

At September 30, 2001 and 2000, the Authority has cash balances of \$5,617,322 and \$13,495,589, respectively, deposited in various checking and savings accounts. Of the total deposits, \$372,639 and \$400,000, respectively, is insured by Federal Depository Insurance Corporation and \$2,654,942 and \$2,757,628, respectively, is deposited in trust accounts collateralized by U.S. Treasury bills and bonds. The remaining balances are not insured or collateralized.

Notes to Financial Statements September 30, 2001 and 2000

(2) Cash and Cash Equivalents, Continued

The Authority has deposited \$84,722 and \$69,283 in money market funds which are collateralized by open-ended U.S. Treasury Bills and U.S. Treasury Notes at September 30, 2001 and 2000, respectively. These investments are recorded at cost and earn interest at 4.87% and 5.99%, respectively.

(3) Retained Earnings, Public Assets

Contributions from Government of Guam, recorded as public assets, primarily represent the net assets and liabilities transferred from PUAG (see note 1).

(4) Telecommunications Plant in Service

Listed below are the major classes of the telecommunications plant in service as of September 30, 2001 and 2000:

	<u>2001</u>	<u>2000</u>
Poles, cables and wire Central office equipment Buildings Customer premise equipment Cellular radio facilities Furniture and office equipment Motor vehicles Other equipment	\$ 108,470,918 76,636,826 21,729,118 27,988,826 5,148,672 7,329,815 3,184,196 1,857,406	\$ 107,433,951 73,577,657 21,797,629 25,952,128 4,988,229 5,848,362 3,184,196 1,854,416
Land	830,517	830,517
Less accumulated depreciation	253,176,294 (<u>110,253,137</u>)	245,467,085 (94,332,419)
Net telecommunications plant in service	\$ <u>142,923,157</u>	\$ <u>151,134,666</u>

The provision for depreciation, as a percentage of the average balance of telephone plant in service, was 7.0% in 2001 and 2000. Individual plant depreciable rates for 2001 and 2000 are as follows:

Poles, cables and wire	4%-10%
Central office equipment	5%
Customer premise equipment	2%
Buildings	3%-10%
Furniture and office equipment	10%
Motor vehicles	20%
Cellular radio facilities	8%
Other equipment	20%

The Authority did not write-off any depreciated telecommunications plant during the year ended September 30, 2001.

Notes to Financial Statements September 30, 2001 and 2000

(5) Long-Term Debt

Long-term debt at September 30, 2001 and 2000, is summarized as follows:

	<u>2001</u>	<u>2000</u>
Due to RUS at 5% per annum:		
May 2011, payable in semiannual installments of \$162,000, including interest	\$ 2,589,776	\$ 2,727,642
May 2011, payable in semiannual installments of \$526,000, including interest	8,351,320	8,798,530
April 2012, payable in semiannual installments of \$176,000, including interest	2,891,555	3,040,929
April 2017, payable in semiannual installments of \$308,000, including interest	6,477,553	6,728,934
October 2020, payable in semiannual installments of \$659,000, including interest	15,991,234	16,514,942
May 2025, payable in semiannual installments of \$1,557,000, including interest	42,148,199	43,340,157
Due to RTB:		
October 2020, payable in semiannual installments of \$177,000, including interest at 9.5%	3,080,302	3,137,912
May 2025, payable in semiannual installments of \$117,000, including interest at 6.04%	2,775,385	2,826,752
May 2025, payable in semiannual installments of \$104,000, including interest at 6.05%	2,515,289	2,566,310
May 2025, payable in semiannual installments of \$79,000, including interest at 6.05%	1,779,020	1,828,304

2005	4,887	,270	5,643,991
2006	5,158	,220	5,372,125
Thereafter	90,996	,448	52,388,802
	\$ <u>114,724</u>	<u>,019</u> \$	81,851,031

Notes to Financial Statements September 30, 2001 and 2000

(5) Long-Term Debt, Continued

Unadvanced loan balance as of September 30, 2001, is as follows:

Federal grantor/ program title/ project designation	Authorized amount	Drawndown amount	Unadvanced <u>amount</u>
Rural Telephone Bank loan: Guam 501-E7, Tamuning	\$ 16,082,850	\$ 14,942,323	\$ 1,140,527

Public Law 21-116 set the Authority's debt limit at \$150,607,800.

Outstanding RUS, RTB and FFB bonds are special obligations of the Authority payable from and collateralized by the proceeds of the bonds, all revenues, and all funds established by the bond indenture. These bonds do not constitute a general indebtedness of the Authority or the Territory of Guam. Revenues are defined in the bond indenture as all revenues, income, rents and receipts derived from the ownership, leasing and operation of the telephone system (System), the proceeds of any insurance covering business interruption loss relating to the System, and interest or dividends received on any moneys or securities (other than the Development Fund) held pursuant to the indenture and paid to the Revenue Fund.

In accordance with the indenture, the Authority established the following trust accounts to be held and administered by the Trustee for the bondholders:

<u>Development Fund</u> - The proceeds of all bonds are to be deposited into the Development Fund. All costs of construction (including acquisitions) of all facilities are to be paid from this fund. Insurance proceeds from physical loss of or damage to any facilities of the system, and proceeds from contractors' performance bonds are to be deposited into this fund. Proceeds from sale or lease-sale of any facilities included in the System shall be maintained in this fund and used to finance future construction.

Revenue Fund - All revenues are to be deposited into the Revenue Fund. All costs relating to the system, in addition to the costs for the payment of which moneys from time to time shall have been deposited in the Development Fund and in the Debt Service Fund, are to be paid from the Revenue Fund. The Trustee shall transfer funds from the Revenue Fund to the Debt Service Fund on or before the twenty-fifth (25th) day of each calendar month, to the extent such amount is available in the Revenue Fund after paying the monthly operating expenses with respect to the System, an amount equal to one-twelfth (1/12) of the Twelve-Month Debt Service Requirement, as defined in the Indenture. Deficiencies in any month shall be transferred to the Debt Service Fund on the earliest date on which funds become available in the Revenue Fund.

<u>Debt Service Fund</u> - The Trustee, on behalf of the Authority, shall make all payments of principal and interest on the bonds from the Debt Service Fund.

Management of the Authority is of the opinion that it has complied with all significant bond covenants with the exception of meeting RUS tier requirements during the year ended September 30, 2001.

Notes to Financial Statements September 30, 2001 and 2000

(6) Employees' Retirement Plan

Employees of the Authority hired before October 1, 1995 are members of the Government of Guam Employees' Retirement System, a defined benefit, contributory pension plan. The Plan is administered by the Government of Guam Retirement Fund, to which the Authority contributes based upon a fixed percentage of the payroll for those employees who are members of the Plan.

As a result of the most recent actuarial valuation performed as of September 30, 2000, it has been determined that for the year ended September 30, 2001, a minimum combined employer and employee contribution rate of 34.64% of covered payroll is required to appropriately fund the current cost, amortize prior service costs and provide for interest on the unfunded accrued liability. Statutory contribution rates for employee and employer contributions were 9.5% and 18.6%, respectively, for the year ended September 30, 2001. The effect of the Authority's prior year accruals for its share of pension underfunding reduces the actuarially determined employer contribution rate from 25.14% to an effective rate of 17.13% for the year ended September 30, 2001. In recognition of the above, an accrual reduction of 1.47% of covered payroll is necessary to reduce the unfunded liability based on the difference between the effective rate of 17.13% and the employer's statutory rate of 18.6%. The effective contribution rate for the year ended September 30, 2000 was 16.46%.

The defined benefit plan utilized the actuarial cost method termed "entry age normal" with an assumed rate of return of 8% and an assumed salary scale increase of 5.5% per annum. The most recent actuarial valuation performed as of September 30, 2000, did not provide a breakdown of actuarial present value of vested and non-vested accumulated plan benefits by sponsor or net assets available for benefits by sponsor.

On September 29, 1995, the Guam Legislature passed Public Law 23-43 which created the Defined Contribution Retirement System (DCRS). All employees of the Authority, hired after October 1, 1995, are members of the DCRS, a defined contribution, contributory pension plan. The Board of Trustees of the Government of Guam Retirement Fund is responsible for the administration of the DCRS. Investment management and plan administration services for the DCRS are performed by a private firm contracted by the Board of Trustees.

Contributions into the DCRS by members are based on an automatic deduction of 5% of the member's regular base pay. The contribution is periodically deposited into an individual annuity account within the DCRS. Employees are afforded the opportunity to select from different annuity accounts available under the DCRS.

Employer contributions into the DCRS are based on a statutory amount of 18.6% of the member's regular base pay. Of the amount contributed by the employer, only 5% of the member's regular base pay is deposited into the member's individual annuity account. The remaining 13.6% is contributed towards the unfunded liability of the defined benefit plan.

Members of the DCRS who have completed five years of government service have a vested balance of 100% of both member and employer contributions plus any earnings thereon.

Notes to Financial Statements September 30, 2001 and 2000

(6) Employees' Retirement Plan, Continued

The cost to the Authority for retirement contributions for the years ended September 30, 2001 and 2000 is as follows:

	<u>2001</u>	<u>2000</u>
Cash contributions	\$ 2,313,609	\$ 2,328,302
Reduction of accrued unfunded liability	(336,085)	(270,614)
	\$ 1,977,524	\$ 2,057,688

Public Law #26-70 states that the Authority has no further responsibility to record future unfunded retirement costs and its deferred liability to the Government of Guam is transferred to the Government of Guam primary account. The Authority recorded other income of \$11,782,609 during the year ended September 30, 2001, upon implementation of this law. The Authority's unfunded retirement costs are now recorded within the financial statements of the Government of Guam. As of September 30, 2001, the Government of Guam has accrued approximately \$11,782,609 for the Authority's cumulative unfunded retirement liability.

(7) Commitments and Contingency

Leases

Rental expense for operating leases in 2001 and 2000 totalled \$165,691 and \$132,341, respectively. Future obligations under such leases are not significant.

Medicare

The Government of Guam and its component units, including the Authority, began withholding and remitting funds to the U.S. Social Security System for the health insurance component of its salaries and wages effective October 1998. Prior to that date, the Government of Guam did not withhold or remit Medicare payments to the U.S. Social Security System. If the Government is found to be liable for Medicare payments on salaries and wages prior to October 1998, an indeterminate liability could result. It has been the practice of the Authority and all other component units of the Government of Guam that payment of this health insurance component is optional prior to October 1998. Therefore, no liability for any amount which may ultimately arise from this matter has been recorded in the accompanying financial statements.

Self Insurance

The Authority has commercial insurance coverage for owners, landlords and tenants liability, fidelity and forgery, robbery/safe burglary, workmen's compensation, automobile and comprehensive liability. The Authority also has commercial property insurance coverage for 95% of the total net book value of fixed assets. The Authority is of the opinion that it has suffered no material losses in the past three years related to damages to telecommunications plant in service.

Litigation

The Authority is involved in litigation whose final outcome is not expected to have a material impact on the accompanying financial statements.

Notes to Financial Statements September 30, 2001 and 2000

(7) Commitments and Contingency, Continued

Debt Covenant

Article IV, Section 22 of the supplemental RUS Loan Agreement (see note 5), sets out certain financial ratio requirements. During the year ended September 30, 2001, the Authority was in noncompliance with this requirement. The impact on the financial statements is not currently determinable.

(8) Adoption of New Accounting Principle

Effective October 1, 2000, the Authority adopted GASB Statement No. 33, "Accounting and Financial Reporting for Nonexchange Transactions." GASB No. 33 establishes more uniform revenue recognition criteria and financial reporting standards regarding the timing of recognition of the results of nonexchange transactions involving cash and other financial and capital resources. The provisions of GASB No. 33 were applied to all periods presented; and accordingly, certain items in the 2000 financial statements are reported differently than previously presented. Implementation of GASB No. 33 had no impact on the statements of operations and cash flows for 2000.

(9) Subsequent Events

On July 5, 2002, the island of Guam was struck by a typhoon. Furthermore, on December 8, 2002, the island of Guam was struck by a super typhoon. The Authority expects much of the damage to be covered by insurance; however, total typhoon damages and the related insurance settlement are presently not determinable.

INDEPENDENT AUDITORS' REPORT ON COMPLIANCE AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING BASED ON THE AUDIT PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

The Board of Directors Guam Telephone Authority:

We have audited the financial statements of the Guam Telephone Authority (the Authority), as of September 30, 2001, and for the year then ended, and have issued our report thereon dated April 30, 2002. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Compliance

As part of obtaining reasonable assurance about whether the Authority's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed one instance of noncompliance as described in the accompanying Schedule of Findings and Questioned Costs in finding number 01-5, that is required to be reported under *Government Auditing Standards*.

Internal Control over Financial Reporting

In planning and performing our audit, we considered the Authority's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on the internal control over financial reporting. However, we noted certain matters involving the internal control over financial reporting and its operation that we consider to be reportable conditions. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operations of the internal control over financial reporting that, in our judgment, could adversely affect the Authority's ability to record, process, summarize and report financial data consistent with the assertions of management in the financial statements. Reportable conditions are described in the accompanying Schedule of Findings and Questioned Costs in finding numbers 01-1 through 01-9.

A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, we believe none of the reportable conditions described above is a material weakness.

This report is intended for the information of Board of Directors and management of the Authority and the Rural Utilities Service, Rural Telephone Bank and Federal Financing Bank, federal awarding agencies, pass-through entities, the cognizant audit and other federal agencies, and is not intended to be, and should not be, used by anyone other than those specified parties.

INDEPENDENT AUDITORS' REPORT ON COMPLIANCE WITH REQUIREMENTS APPLICABLE TO EACH MAJOR PROGRAM AND INTERNAL CONTROL OVER COMPLIANCE AND ON THE SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS IN ACCORDANCE WITH OMB CIRCULAR A-133

The Board of Directors Guam Telephone Authority:

Compliance

We have audited the compliance of the Guam Telephone Authority (the Authority) with the types of compliance requirements described in the *U.S. Office of Management and Budget (OMB) Circular A-133 Compliance Supplement* that are applicable to its one major federal program for the year ended September 30, 2001. The Authority's major federal program is identified in the summary of auditors' results section of the Schedule of Findings and Questioned Costs (page 21). Compliance with the requirements of laws, regulations, contracts and grants applicable to its one major federal program is the responsibility of the Authority's management. Our responsibility is to express an opinion on the Authority's compliance based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, and OMB Circular A-133, *Audits of States*, *Local Governments and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the Authority's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination on the Authority's compliance with those requirements.

In our opinion, GTA complied, in all material respects, with the requirements referred to above that are applicable to its one major federal financial assistance program for the year ended September 30, 2001.

Internal Control Over Compliance

The management of the Authority is responsible for establishing and maintaining effective internal control over compliance with requirements of laws, regulations, contracts and grants applicable to federal programs. In planning and performing the audit, we considered the Authority's internal control over compliance with requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133.

We noted certain matters involving the internal control over compliance and its operation that we consider to be reportable conditions. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control over compliance that, in our judgment, could adversely affect the Authority's ability to administer a major federal program in accordance with applicable requirements of laws, regulations, contracts and grants. The reportable condition is described in the accompanying Schedule of Findings and Questioned Costs as item 01-5.

A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that noncompliance with applicable requirements of laws, regulations, contracts, and grants that would be material in relation to a major federal program being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Our consideration of the internal control over compliance would not necessarily disclose all matters in the internal control that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, we believe the reportable condition described above is not a material weaknesse.

Schedule of Expenditures of Federal Awards

H Nach II

We have audited the financial statements of the Authority as of and for the year ended September 30, 2001, and have issued our report thereon dated April 30, 2002. Our audit was performed for the purpose of forming an opinion on the financial statements taken as a whole. The accompanying schedule of expenditures of federal awards is presented for the purpose of additional analysis as required by OMB Circular A-133 and is not a required part of the financial statements. This schedule is the responsibility of the management of the Authority. Such information has been subjected to the auditing procedures applied in our audit of the financial statements and, in our opinion, is fairly stated in all material respects when considered in relation to the financial statements taken as a whole.

This report is intended for the information of Board of Directors and management of the Authority and the Rural Utilities Service, Rural Telephone Bank and Federal Financing Bank, federal awarding agencies, pass-through entities, the cognizant audit and other federal agencies, and is not intended to be, and should not be, used by anyone other than those specified parties.

April 30, 2002

Schedule of Expenditures of Federal Awards Year Ended September 30, 2001

Schedule of Findings and Questioned Costs Year Ended September 30, 2001

Part I - Summary of Auditors' Results

- 1. The Independent Auditors' Report on the financial statements expressed an unqualified opinion.
- 2. Reportable conditions in internal control over financial reporting were identified, none of which are considered to be material weaknesses.
- 3. No instance of noncompliance considered material to the financial statements was disclosed by the audit.
- 4. Reportable conditions in internal control over compliance with requirements applicable to major federal awards programs were identified, none of which are considered to be material weaknesses.
- 5. The Independent Auditors' Report on compliance with requirements applicable to major federal award programs expressed an unqualified opinion.
- 6. The audit disclosed one finding required to be reported by OMB Circular A-133.
- 7. The Organization's major programs were:

Name of Federal Program or Cluster	<u>CFDA Number</u>
Rural Telephone Bank	10.852
Rural Utilities Service	10.851
Federal Financing Bank	N/A

- 8. A threshold of \$300,000 was used to distinguish between Type A and Type B programs, as those terms are defined in OMB Circular A-133.
- 9. The Organization did not qualify as a low-risk auditee as that term is defined in OMB Circular A-133.

Schedule of Findings and Questioned Costs, Continued Year Ended September 30, 2001

Finding Number 2001-1 - Stale Dated Checks

Criteria:

The subsidiary ledgers for stale dated checks and unclaimed checks should be reviewed and adjusted on a consistent basis.

Condition:

Review of the stale dated and unclaimed check subsidiaries for GTA landline and cellular indicate that checks in this account are dated as follows:

GTA Landline	Stale dated checks: 1997 and prior 1998 1999	\$ 157,534 30,204 40,004
		227,742
	Unclaimed checks: 2000 and prior	107,477
GTA Cellular	Stale dated checks: 2000 and prior	7,538
	Unclaimed checks: 2000 and prior	4,113
Total		\$ <u>346,870</u>

Cause:

The cause of this condition is that resolution of this finding has yet to occur.

Effect:

A possible misstatement of stale dated checks could result from this condition.

Prior Year Status:

The above condition is reiterative of conditions identified in the prior year audit of the Guam Telephone Authority.

Recommendation:

We recommend that management review the stale dated checks ledger on a quarterly basis and investigate amounts outstanding more than ninety days for possible adjustment.

Schedule of Findings and Questioned Costs, Continued Year Ended September 30, 2001

Finding Number 2001-1 - Stale Dated Checks, Continued

Auditee Response dated January 7, 2003:

GTA agrees with the recommendation. Ms. Alice Cruz, Accounting Technician Supervisor, has been tasked to develop and implement a procedure to ensure proper handling of stale dated and unclaimed checks. Timeline given to Ms. Cruz is three months from August 5, 2002.

In the interim, Ms. Lita Tambalo and Ms. Judith Guerrero will be responsible for reviewing all requests for customer refunds to ensure the appropriate mailing address is used when processing a check. Additionally, should a check be returned, Ms. Tambalo and Ms. Guerrero will make every effort to contact the customer.

Schedule of Findings and Questioned Costs, Continued Year Ended September 30, 2001

Finding Number 2001-2 - Inventory

Criteria:

Per review of management's response to our audit letter dated December 6, 1995, it was noted that beginning August 1995, warehouse personnel should conduct quarterly inventories to eliminate inventory spoilage and to make a determination of obsolescence on those items counted. Per review of management's response to our letter dated May 25, 2000, it was noted that GTA had established new standard operating procedures for the survey of obsolete inventories with monthly meetings to be convened by a survey committee. Additionally, per review of management's response to our letter dated June 8, 2001, it was noted that GTA would re-institute the survey committee, but would prioritize the corrective action plans for prior year findings 00-1 and 00-4 (accounts receivable area) prior to addressing the corrective action plan for this finding.

Condition:

The inventory allowance for GTA and Cellular is accrued at a rate of \$2,000 per month.

Cause:

Periodic analyses of excess damaged, discontinued or obsolete inventory are not prepared. Quantities on hand are not monitored to determine the adequacy of recorded reserves. An "inventory allowance expense" of \$2,000 per month is recorded, regardless of the physical characteristics or aging of inventory.

Effect:

The failure to perform periodic analyses of damaged, discontinued and obsolete inventory reduces management's ability to take timely corrective action to dispose of these items. In addition, this condition increases the risk that inventory balances could be overstated as a result of recording such items at original cost rather than at net realizable value as required by generally accepted accounting principles. There is also a risk that inventory may be understated due to excessive reserves since some outdated items may represent long-term replacement parts.

Prior Year Status:

The above condition is reiterative of conditions identified in the prior year audit of the Guam Telephone Authority.

Recommendation:

Management should review and adhere to existing policies and procedures for monitoring excess, discontinued or obsolete inventory. Long-term replacement parts should be identified and separately classified.

Schedule of Findings and Questioned Costs, Continued Year Ended September 30, 2001

Finding Number 2001-2 – Inventory, Continued

Auditee Response dated January 7, 2003:

GTA Survey committee has conducted surveys in January 2002 and June 2002. Included in these surveys were items that were identified as damaged or obsolete inventory as identified by Plant and Engineering personnel. The committee will continue to meet quarterly to assess items that have been designated for survey by various departments of the Authority.

Additionally, warehouse personnel have worked with various departments and have identified long-term replacement parts. Ann DeJesus, Accounting Technician, in charge of inventory is currently reviewing the list to verify if indeed items are slow moving and should be reclassified a long-term replacement parts. Reclassification to long-term replacement parts should be done by the beginning of fiscal year 2003.

Schedule of Findings and Questioned Costs, Continued Year Ended September 30, 2001

Finding Number 2001-3 - Deposits in Transit

Criteria:

Bank reconciling items should be properly documented.

Condition:

Deposits in transit below totaling \$128,986.77 were not properly supported:

Bank Name	e Account Name	Deposit in Transit Per Bank Recon	Deposit in Transit Per <u>Schedule</u>	<u>Difference</u>
BOG BOH	Customer Collection Checking # 0038-007602	\$ 461,894.44 63,238.86	\$ 358,632.48 37,514.05	\$ 103,261.96 25,724.81
Total				\$ <u>128,986.77</u>

Cause:

The Authority utilizes a reconciliation procedure to derive total deposits in transit for use in bank reconciliations.

Effect:

The condition may result in a misstatement of cash balances of the affected accounts.

Recommendation:

Management should review and revise its current bank reconciliation procedures.

Auditee Response dated January 7, 2003:

GTA agrees with the recommendation. Ms. Lilian Babauta, Accounting Technician is tasked to reconcile bank statements is to support her in-transit amounts with schedule of dates and amounts that make up the dollar values identified as in-transit.

Schedule of Findings and Questioned Costs, Continued Year Ended September 30, 2001

Finding Number 2001-4 - Accounts Receivable Reclassification

Criteria:

The inactive accounts receivable subsidiary ledger should be reviewed and reconciled on a regular basis to ensure proper classification.

Condition:

During our testing of inactive accounts receivable balances for GTA landline and cellular, we noted amounts in need of reclassification; however, due to system classification problems on conversion and classification entry errors, we are unable to identify the appropriate reclassification entry. Additionally, we noted that the sub-ledger did not agree to the general ledger as noted below:

	<u>GTA</u>	<u>CELLULAR</u>
Inactive balance per sub ledger Inactive balance per G/L	\$ 2,135,002 2,350,062	\$ 1,989,146 2,017,330
Difference	\$ <u>215,060</u>	\$28,184

Cause:

We are aware that Authority personnel have been working on this matter, which is not yet fully resolved

Effect:

Inaccuracies in the schedules will prevent regular reconciliation of balances to the general ledger and the proper aging of inactive customer accounts receivable.

Prior Year Status:

The above condition is reiterative of conditions identified in the prior year audit of the Guam Telephone Authority.

Recommendation:

We recommend that management promptly resolve this condition. Management should consider seeking consultation from its system software provider.

Auditee Response dated January 7, 2003:

The GTA accounting staff has been working closely with our ISD department to implement processes to update the Inactive Subsidiary Ledgers. Viola Cruz, Accountant, has been tasked with monitoring and reconciling the Inactive Subsidiary Ledgers.

Schedule of Findings and Questioned Costs, Continued Year Ended September 30, 2001

Finding Number 2001-5 – Long-Term Debt

Criteria:

Article IV of the Rural Utilities Service loan agreement states that the Authority should maintain a tariff designed to produce net income or margins, before interest, in such amounts that when divided by the amount of interest requirements on all of the borrower's outstanding and proposed loans, produces a ratio of 1.5

Condition:

The Authority's RUS Form 479 for the following quarters indicated the following:

Quarter Ended	Tier Ratio
December 31, 2000	1.24
March 31, 2001	0.17
June 30, 2001	0.50
September 30, 2001	(0.85)

Cause:

The above condition does not reflect the adjustment of the unfunded retirement liability of the Authority's financial statements as mandated by Public Law 26.70.

Effect:

The above condition results in noncompliance with RUS debt covenants for the fiscal year ended September 30, 2001. However, it appears as a result of Public Law 26.70, this matter has subsequently been resolved.

Prior Year Status:

The above condition is reiterative of conditions identified in the prior year audit of the Guam Telephone Authority.

Recommendation:

We recommend that the Authority review projections for fiscal year 2002 to ensure tier requirements are met.

Auditee Response dated January 7, 2003:

The GTA agrees with the recommendation that the Authority review projections for fiscal year 2002 to meet its tier requirements.

GTA agrees with the audit recommendation and will review on a quarterly basis the financial statements in order to make recommendations to the General Manager relative to tier disposition.

Schedule of Findings and Questioned Costs, Continued Year Ended September 30, 2001

Finding Number 2001-6 - Plant Specific Expense

Criteria:

Authority expenditures should be in line with services rendered and/or in line with the specific purpose of the Authority.

Condition:

Expenses for dump truck and backhoe rentals do not always clearly state the project to which the item relates. Additionally, it appears that review of such expenses should occur to determine whether these expenses should be capitalized.

Cause:

The cause of this condition appears to be that documentation of the manner in which the Authority benefited from these expenses was not always prepared and on file.

Effect:

This condition could result in items being expensed rather than capitalized and could result in other misclassified transactions.

Recommendation:

We recommend that the Authority review equipment rental expenses for compliance with the criteria.

Auditee Response dated January 7, 2003:

During fiscal year 2001, customer complaints/demands were escalating due to construction and installation schedule set backs. This was due to subscriber growth, facility damages, deterioration, and torrential rains which caused flooding in several areas throughout the island.

Plant Department formed a temporary backup crew of installers and cable splicer to assist in reducing the backorders. However, the existing dump trucks owned by GTA were being fully utilized by Force Account for job order and capital improvement projects. GTA's backhoes which are used and shared among Plants Northern, Central and southern Cable Maintenance crews, as well as Force Account, were frequently down and under repair due to age, wear and tear, and unavailability of parts.

The increased usage of equipment rental was therefore warranted during this period in order for Plant to achieve its efforts in delivering dial tone.

Schedule of Findings and Questioned Costs, Continued Year Ended September 30, 2001

Finding Number 2001-7 - Depreciation Expense

Criteria:

Per review of "Stipulation Docket 99-05" before the Public Utilities Commission, Guam Telephone Authority and Georgetown Consulting Group (GCP) agree that fixed assets classified as buried cable metallic should be depreciated using twenty (20) years or two hundred forty (240) month lives.

Condition:

During tests of depreciation, it was noted that all assets under G/L # 242310 (buried cable metallic) were depreciated using twenty (25) years or three hundred (300) month lives.

Cause:

It appears that correction of the assets' useful lives was not timely performed in the system.

Effect:

This condition resulted in a year-end audit adjustment of \$906,559 to increase depreciation.

Recommendation:

Management should periodically review useful lives used to depreciate assets to ensure asset depreciation is in accordance with regulatory requirements.

Auditee Response dated January 7, 2003:

GTA agrees with the recommendation. Ellen Santos, Accountant and Lilian Babauta, Accounting Technician will review the asset's life months and ensure that the fixed assets depreciation is in accordance with regulatory requirements.

Schedule of Findings and Questioned Costs, Continued Year Ended September 30, 2001

Finding Number 2001-8 - Accounts Receivable Aging and Receipts

Criteria:

The accounts receivable active and inactive subsidiary ledgers should be properly aged and customer payments should be applied against specific invoices.

Condition:

Valuation procedures performed on the accounts receivable inactive account indicate that outstanding customer balances are not being properly categorized in the appropriate aging categories. These procedures also indicate that customer payments do not appear to be properly allocated against specified invoices upon receipt.

Cause:

The Authority's system does not require that payments be matched with specific invoices.

Effect:

The accounts receivable active and inactive account balances may not be properly aged.

Prior Year Status:

The above condition is reiterative of conditions identified in the prior year audit of the Guam Telephone Authority.

Recommendation:

We recommend that management review the current billing and receipt system and propose modifications to allow for proper application of customer payments against specific outstanding invoices.

Auditee Response dated January 7, 2003:

Accounts receivable balances are properly aged in most cases. Accounts with improper aging were a result of adjustments entered with the wrong date. New procedures have been put in place to ensure adjustments. Adjustments can be applied to specific invoices, but we do not currently apply payments to specific invoices. Our ICMS System currently automatically applies payments to the oldest invoice.

There is a Payment Allocation process available, which would allow payment application to specific invoices. However, ICMS Support has recommended that we do not implement this feature, because it may produce unpredictable results. We have tested this process, and found discrepancies, with running reminder notices and suspension selection. To resolve these discrepancies, we have developed an inhouse process to print reminder notices and process suspension selection. The reminder notice process was implemented in May of this year, and the suspension was implemented in December. We are hoping to complete testing of this process within the next month.

Schedule of Findings and Questioned Costs, Continued Year Ended September 30, 2001

Finding Number 2001-9 – Capitalization Policy

Criteria:

Capitalization policies relating to construction and other capitalized projects should be reviewed for proper treatment and recording.

Condition:

The Authority capitalized \$1,592,971 and \$1,870,165 of labor and other overhead costs associated with construction and other capitalized projects during fiscal years 2001 and 2000, respectively. Management has not examined the propriety of such capitalization policies in recent years.

Cause:

The cause of this condition appears to be the result of the Authority's current capitalization practices.

Effect:

There does not appear to be significant impact on the presentation of the plant in service account of the construction work in progress accounts; however, capitalization policies improperly established may result in a misstatement of these accounts.

Recommendation:

We recommend that management periodically review the procedures used for capitalization of labor and other overhead costs for propriety.

Auditee Response dated January 7, 2003:

GTA agrees with the recommendation. Ellen Santos, Accountant and Lilian Babauta, Accounting Technician will periodically review the procedures used for capitalization of labor and other overhead costs for propriety. They will also work together with the Engineering department to ensure work orders are closed in the appropriate period to comply with the current policies.

Schedule of Prior Year Audit Findings Year Ended September 30, 2001

INDEPENDENT AUDITORS' MANAGEMENT LETTER REPORT

The Board of Directors Guam Telephone Authority:

We have audited the financial statements of the Guam Telephone Authority (GTA), as of September 30, 2001, and for the year then ended, and have issued our report thereon dated April 30, 2002. We conducted our audit in accordance with auditing standards generally accepted in the United States of America, the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, and 7 CFR Part 1773, Policy on Audits of Rural Utilities Service (RUS) Borrowers. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

In planning and performing our audit of the financial statements of GTA for the year ended September 30, 2001, we considered its internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing an opinion on the financial statements and not to provide assurance on the internal control over financial reporting.

A description of the responsibility of management for establishing and maintaining the internal control over financial reporting, and the objectives of and inherent limitations in such control is set forth in our Independent Auditors' Report on Compliance and Internal Control Over Financial Reporting Based Upon the Audit Performed in Accordance with *Government Auditing Standards* dated April 30, 2002, and should be read in conjunction with this report.

Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be material weaknesses. A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control over financial reporting that we consider to be material weaknesses.

7 CFR Part 1773.34 requires comments on specific aspects of the internal control over financial reporting, compliance with specific RUS loan and security instrument provisions, and other additional matters. In addition to obtaining reasonable assurance about whether the financial statements are free from material misstatements, at your request, we performed tests of specific aspects of the internal control over financial reporting, of compliance with specific RUS loan and security instrument provisions, and of additional matters. The specific aspects of the internal control over financial reporting, compliance with specific RUS loan and security instrument provisions, and additional matters tested include, among other things, the accounting procedures and records, materials control, compliance with specific RUS loan and security instrument provisions set forth in 7 CFR Part 1773.34(e)(2) and related party transactions. In addition, our audit of the financial statements also included the procedures specified in 7 CFR Part 1773.38-.45. Our objective was not to provide an opinion on these specific aspects of the internal control over financial reporting, compliance with specific RUS loan and security instrument provisions, or additional matters, and accordingly, we express no opinion thereon.

No reports (other than our Independent Auditors' Report, our Independent Auditors' Report on Compliance and on Internal Control over Financial Reporting Based Upon the Audit Performed in Accordance with *Government Auditing Standards* and our Independent Auditors' Report on Compliance and Internal Control Over Compliance Applicable to Each Major Federal Award Program, all dated April 30, 2002) or summary of recommendations related to our audit have been furnished to management.

Our comments on specific aspects of the internal control over financial reporting, compliance with specific RUS loan and security instrument provisions, and other additional matters as required by 7 CFR Part 1773.34 are presented below.

<u>COMMENTS ON CERTAIN SPECIFIC ASPECTS OF THE INTERNAL CONTROL OVER FINANCIAL REPORTING</u>

We noted no matters regarding GTA's internal control over financial reporting and its operation that we consider to be a material weakness as previously defined with respect to:

- the accounting procedures and records;
- the process for accumulating and recording labor, material, and overhead costs, and the distribution of these costs to construction, retirement, and maintenance or other expense accounts, and;
- . the materials control.

EXCEPT AS NOTED IN FINDING NUMBER 01-5, COMMENTS ON COMPLIANCE WITH SPECIFIC RUS LOAN AND SECURITY INSTRUMENT PROVISIONS

Management's responsibility for compliance with laws, regulations, contracts, and grants is set forth in our Independent Auditors' Report on Compliance and on Internal Control Over Financial Reporting Based Upon the Audit Performed in Accordance with *Government Auditing Standards* dated April 30, 2002, and should be read in conjunction with this report. At your request, we have performed the procedures enumerated below with respect to compliance with certain provisions of laws, regulations, contracts and grants. The procedures we performed are summarized as follows:

- Procedures performed with respect to the requirement to maintain all funds in institutions whose accounts are insured by an Agency of the Federal Government:
 - .. Obtained information from financial institutions with which GTA maintains funds that indicated that the institutions are insured by an Agency of the Federal Government.
- Procedures performed with respect to the requirement for a borrower to obtain written approval of the mortgagee to enter into any contract for the operation or maintenance of property, for the use of mortgaged property by others, or for services pertaining to toll traffic, operator assistance, or switching for the year ended September 30, 2001, of GTA.
 - GTA did not enter into any new contracts for the operation or maintenance of its property, or for the use of its mortgaged property by others, or for services pertaining to toll traffic, operator assistance, or switching as defined in §1773.34 (e)(2)(i) during the year ended September 30, 2001.

COMMENTS ON OTHER ADDITIONAL MATTERS

In connection with our audit of the financial statements of GTA, nothing came to our attention that caused us to believe that GTA failed to comply with respect to:

- the reconciliation of subsidiary plant records to the controlling general ledger plant accounts addressed at 7 CFR Part 1773.34(c)(1);
- the clearing of construction accounts and the accrual of depreciation on completed construction addressed at 7 CFR Part 1773.34(c)(2);
- the retirement of plant addressed at 7 CFR Part 1773.34(c)(3) and (4);
- . sales of plant material or scrap addressed at 7 CFR Part 1773.34(c)(5); and
- the disclosure of material related party transactions, in accordance with Statement of Financial Accounting Standards (SFAS) No. 57, "Related Party Transactions," for the year ended September 30, 2001, in the financial statement referred to in the first paragraph of this report addressed at 7 CFR Part 1773.34(f).

REPORTABLE CONDITIONS

In connection with our audit of the financial statements of GTA, we noted reportable conditions which are set forth in findings 01-1 through 01-9 on pages 23 to 33.
