INDEPENDENT AUDITORS' REPORT

Board of Regents University of Guam:

We have audited the accompanying balance sheets of the University of Guam, a component unit of the Government of Guam, as of September 30, 1999, and the related statements of changes in fund balances (deficits), and current funds revenues, expenditures and other changes for the year then ended. These financial statements are the responsibility of the University's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the financial position of the University of Guam as of September 30, 1999, and the changes in its fund balances (deficits) and its current funds revenues, expenditures and other changes for the year then ended, in conformity with generally accepted accounting principles.

In accordance with *Government Auditing Standards*, we have also issued our report dated May 3, 2000, on our consideration of the University of Guam's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grants. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be read in conjunction with this report in considering the results of our audit.

Notes to Financial Statements September 30, 1999

1. Organization

Administrative autonomy was granted to the University of Guam (the University) with the enactment of Public Law 13-194, "The Higher Education Act of 1976," which became effective on November 3, 1976. The Act, with subsequent amendments, established the University as a non-membership, not-for-profit corporation of the Government of Guam, under the control and operation of a nine-member Board of Regents appointed by the Governor with the advice and consent of the Legislature. The University is a component unit of the Government of Guam.

2. Summary of Significant Accounting Policies

- A. <u>Accrual Basis</u>. The financial statements of the University of Guam have been prepared on the accrual basis. The statement of current funds revenues, expenditures and other changes is a statement of financial activities of current funds related to the current reporting period. It does not purport to present results of operations or the net income or loss for the period as would a statement of income or a statement of revenues and expenses.
- B. <u>Investments</u>. The University adopted Statement No. 31 of the Governmental Accounting Standards Board (GASB No. 31), *Accounting and Financial Reporting for Certain Investments and for External Investment Pools*, effective for the year ended September 30, 1998, which among other provisions, resulted in a change from reporting investments at cost to reporting investments at fair value.
- C. <u>Cash</u>. Cash includes cash on hand, cash in banks, cash in escrow and money market accounts and time certificates of deposit with original maturities of less than ninety days.

At September 30, 1999, the University has cash balances in banks of \$3,189,597, of which \$201,062 and \$1,901,350 is insured by the Federal Deposit Insurance Corporation, or collateralized by securities held by a trustee in the name of the financial institution, respectively. The remaining balance is uninsured.

- D. <u>Short-term Investments</u>. Short-term investments include bank time certificates of deposit with original maturities of ninety days or more.
- E. <u>Additions to Plant Assets</u>. To the extent that current funds are used to finance plant assets, the amounts so provided are accounted for as (1) expenditures, in the case of normal replacement of movable equipment; (2) mandatory transfers, in the case of required provisions for debt amortization and interest and equipment renewal and replacement; and (3) transfers of a non-mandatory nature for all other cases.
- F. <u>Depreciation</u>. Depreciation is calculated using the straight-line method over estimated useful lives of 5 50 years for buildings and improvements and 5 15 years for equipment and land improvements. The University of Guam capitalization policy requires acquisitions greater than \$5,000 to be capitalized and depreciated over the assets' useful lives. The assets are carried at cost, except for land and buildings transferred to the University which were recorded at management's estimate of fair market value at the date of acquisition. These additions have since been adjusted to fair market value as determined by independent appraisals completed during fiscal year 1988.

Notes to Financial Statements September 30, 1999

2. Summary of Significant Accounting Policies, Continued

- G. <u>Inventory Method</u>. Inventory is stated at the lower of cost or market with cost being determined using the first-in, first-out method of valuation.
- H. <u>Employees' Retirement Plan</u>. Employees of the University hired before September 30, 1995, are under the Government of Guam Employees' Retirement System (a defined benefit, contributory pension plan). Employees hired after September 30, 1995, are members of the Defined Contribution Retirement System (DCRS). Until 1998, those employees who were members of the Defined Benefit Plan with less than 20 years of service at September 30, 1995, had the option to switch to the Defined Contribution Retirement System.

The Defined Benefit Plan and the DCRS are administered by the Government of Guam Retirement Fund, to which the University contributes based upon a fixed percentage of the payroll for those employees who are members of the Plan.

As a result of the most recent actuarial valuation performed as of September 30, 1998, it has been determined that for the year ended September 30, 1999, a minimum combined employer and employee contribution rate of 25.87% of covered Defined Benefit Plan payroll is required to appropriately fund the current cost, amortize prior service costs and provide for interest on the unfunded accrued liability. Statutory contribution rates for employee and employer contributions were 9.5% and 18.6%, respectively, for the year ended September 30, 1999. The effect of the University's prior year accruals for its share of pension underfunding reduces the actuarially determined employer contribution rate from 16.37% to an effective rate of 11.48% for the year ended September 30, 1999. In recognition of the above, an accrual reduction of 7.12% of covered payroll is necessary to reduce the unfunded liability based on the difference between the effective rate of 11.48% and the employer's statutory rate of 18.6%.

The Defined Benefit Plan utilized the actuarial cost method termed "entry age normal" with an assumed rate of return of 8% and an assumed salary scale increase of 5.5% per annum. The most recent actuarial valuation performed as of September 30, 1998, did not provide a breakdown of actuarial present value of vested and non-vested accumulated plan benefits by sponsor or net assets available for benefits by sponsor.

Contributions into the DCRS by members are based on an automatic deduction of 5% of the member's regular base pay. The contribution is periodically deposited into an individual annuity account within the DCRS. Employees are afforded the opportunity to select from different annuity accounts available under the DCRS.

Employer contributions into the DCRS are based on a statutory amount of 18.6% of the member's regular base pay. Of the amount contributed by the employer, only 5% of the member's regular base pay is deposited into the member's individual annuity account. The remaining 13.6% is contributed towards the unfunded liability of the defined benefit plan.

Members of the DCRS who have completed five years of government service, and have attained the age of 55 years at termination, have a vested balance of 100% of both member and employer contributions plus any earnings thereon. Members who have completed five years of service, but have not attained the age of 55, are eligible only for the amount of member contributions plus any earnings thereon.

Notes to Financial Statements September 30, 1999

2. Summary of Significant Accounting Policies, Continued

H. Employees' Retirement Plan, Continued

Contributions for the year ended September 30, 1999, are \$3,732,575.

The University historically accounted for all unfunded retirement fund liabilities entirely within the Current Unrestricted Funds. However, as a result of Public Law #21-03, the University has no further responsibility to pay for its share of the unfunded retirement costs. This responsibility now rests with the General Fund of the Government of Guam. Rather, the University's responsibility is to pay the statutorily imposed retirement rate. As of September 30, 1999, the General Fund has accrued approximately \$13,735,734 for the University's cumulative unfunded retirement liability.

I. <u>Fund Accounting</u>. In order to ensure observance of limitations and restrictions placed on the use of the resources available to the University, accounts of the University are maintained in accordance with the principles of "fund accounting." This is the procedure by which resources for various purposes are classified for accounting and reporting purposes into funds that are in accordance with activities or objectives specified. Separate accounts are maintained for each fund; however, in the accompanying financial statements, funds that have similar characteristics have been combined into fund groups. Accordingly, all financial transactions have been recorded and reported by fund group.

Within each fund group, fund balances restricted by outside sources are so indicated and are distinguished from unrestricted funds allocated to specific purposes by action of the Board of Regents. Externally restricted funds may only be utilized in accordance with the purposes established by the source of such funds and are in contrast with unrestricted funds over which the Board of Regents retains full control to use in achieving any of its purposes.

Endowment funds are subject to restrictions of gift instruments requiring in perpetuity that the principal be invested and only the income be utilized.

All gains and losses arising from the sale, collection or other distribution of investments and other non-cash assets are accounted for in the fund which owned such assets. Generally, ordinary income derived from investments, receivables and the like is accounted for in the fund owning such assets. However, income derived from investment of endowment and similar funds is accounted for in the fund to which it is restricted or, if unrestricted, as revenues in unrestricted current funds. All other unrestricted revenue is accounted for in the unrestricted current fund.

Restricted gifts, grants, appropriations, endowment income and other restricted resources are accounted for in the appropriate restricted funds. Restricted current funds are reported as revenues and expenditures when expended for current operating purposes.

J. <u>Financial Assistance Revenue</u>. Government of Guam appropriations designated for student financial assistance programs are made annually for the period from October 1 to September 30. Funds designated for scholarships that do not require repayment by the recipient are accounted for within the Current Restricted Funds. Those which may require repayment remain within the Loan Funds. As certain restrictions are placed on these funds, revenue is realized only to the extent that such funds are expended for current purposes.

2. Summary of Significant Accounting Policies, Continued

- K. <u>Estimates</u>. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenditures during the reporting period. Actual results could differ from those estimates.
- L. <u>Comparative Balances</u>. The comparative data for the prior year has been presented in certain of the statements to provide an understanding of changes in the University's financial position. However, comparative data was not presented for each of the statements since it would make the financial statements unduly complex and difficult to read.

3. Bonds Payable

Financing for the construction of a dormitory complex and a student union building was obtained from the issuance of "University of Guam Dormitory and Student Union Revenue Bonds of 1968," in the amount of \$2,140,000. Interest is payable semi-annually on April 1 and October 1 of each year at a rate of 6% per annum. The bonds mature in varying amounts from \$30,000 to \$90,000 on October 1 of each year through 2008. Principal and interest are payable from, and are categorized by, a first charge and lien on the net revenues derived by the University Dormitory Revenue Fund, as defined in the bond resolution. The bonds are not an obligation of the Government of Guam, but are solely that of the University Dormitory Revenue Fund.

As a requirement of the bond resolution, the University Dormitory Revenue Fund is to transfer semiannually on March 15, and September 15, to the University Dormitory Interest and Redemption Fund, a sum equal to sixty-two and one-half percent (62 1/2%) of the aggregate amount of principal and interest becoming due on the bonds during the next succeeding twelve months until such time as the funds in the Interest Redemption Fund are sufficient to pay the interest and one-half of the principal next coming due, and to provide a reserve in an amount equal to the average annual debt service which approximates \$94,000.

The bond resolution also requires that when the annual debt service reserve has been satisfied, the Fund is to deposit into an account, to the extent available, up to \$14,000 per year to the credit of the repair and replacement reserve account. These deposits are to continue until a balance of \$280,000 is reached. Bond principal payments for the next succeeding five fiscal years and thereafter are shown below:

Fiscal Year	Amount
2000 2001 2002 2003 2004 2005 and thereafter	\$ 75,000 75,000 80,000 80,000 80,000 <u>345,000</u>
	\$ <u>735,000</u>

Notes to Financial Statements September 30, 1999

4. Student Loans

The Loan Funds grant loans to residents of Guam who attend institutions of higher education. The Guam Legislature appropriates funds for the program, and the University is responsible for awarding the loans and monitoring compliance with respect to repayment. Due to the uncertainty of collection and due to recipient ability to repay the loans through work credits, student loan receivables are fully reserved in the year granted, and payments are reflected as recoveries in the year received. At September 30, 1999, loan receivables are reserved in the amount of \$11,608,175.

5. Investments

Investments exclusive of physical plant are recorded at market; investments received by gift are recorded at market value at the date of acquisition. Realized gains and losses are recognized in the statement of revenues and expenditures upon disposition, and unrealized gains and losses are recorded as net appreciation (depreciation) of fair value in investments in fund balances. Approximately \$11,351,232 of these investments and cash are accounted for on a pooled basis. The University employs the share method of accounting for pooled investments and for proportionate distribution of income to each fund which participates in the pool.

Investments held by the University consist of money market funds, U.S. Treasury and agency obligations, and common stock. These investments are held in the name of the University.

These investments are carried at market in the accompanying financial statements. Credit risk associated with investments is categorized into three levels generally described as follows:

Category 1 - Insured or registered, or securities held by the University or its agent in the University's name.

Category 2 - Uninsured and unregistered, or securities held by a party other than the University or its agent, but in the University's name.

Category 3 - Uninsured and unregistered, with securities held by a party other than the University and not in the University's name.

All investments held by the University have been classified as Category 2 investments in accordance with Governmental Accounting Standards Board (GASB) Statement #3.

The University's demand and time deposits are non-categorized investments in accordance with GASB #3. Demand and time deposits are collateralized under agreements with the respective financial institutions. Commercial paper and mortgages pledged by the financial institutions as collateral are not in the University's name; therefore, these investments, though collateralized, are categorized solely for purposes of GASB #3 as being uncollateralized.

Notes to Financial Statements September 30, 1999

6. Encumbrances

Encumbrances representing outstanding purchase orders and other commitments for materials and services not received as of September 30, 1999, are presented below:

Unrestricted Current Funds	\$ 2,094,905
Restricted Current Funds	985,700
Unexpended Plant Fund	1,110,102
Renewals and Replacements Plant Fund	283,187
	\$ <u>4,473,894</u>

7. Composition of Endowment Funds

The composition of the endowment funds as of September 30, 1999, and the changes in fund balances for the year then ended are as follows:

	Fund 71-UOG Fund 73-UOG Fund 79-UOG				
	Pure	Pure	Quasi-	Fund 72-UOG	
	Endowment	Endowment	Endowment	Quasi-	
	(LGRE)	(GOVGUAM)	(Others)	Endowment	Totals
Cash	\$ 427.637	\$ 19.437	\$ 38,534	\$ 175,221 \$	660,829
Time certificates of deposit	-	-	63,983	-	63,983
Investments	6,618,895	300,851	596,430	2,712,040	10,228,216
Due from (to) other University funds	21,000	(16,674)	8,559	(43,000)	(30,115)
Accrued interest receivable			2,088		2,088
Fund balance	7,067,532	<u>303,614</u>	<u>709,594</u>	<u>2,844,261</u>	<u>10,925,001</u>
Fund balance, September 30, 1998	7,778,983	271,965	615,300	3,066,881	11,733,129
Other additions (deductions):					
Endowment income	-	-	260	-	260

	<u>(711,451</u>)	31,649	94,294	(222,620)	(808,128)
Fund balance, September 30, 1999	\$ <u>7,067,532</u>	\$ <u>303,614</u>	\$ <u>709,594</u>	\$ <u>2,844,261</u> \$	<u>10,925,001</u>

Notes to Financial Statements September 30, 1999

8. Capital Lease Commitments

In November 1997, the University entered into a ten-year capital lease agreement to obtain equipment for the energy conservation project. The lessor originally deposited \$1,227,551 in an escrow account to fund the acquisition of the equipment (carried at \$946,095 at September 30, 1999). Obligations under the capital lease consist of the following at September 30, 1999.

Year Ending September 30,	Capital Lease
2000 2001 2002 2003 2004 2005 and thereafter	
Total payments Less amounts representing interest Total obligation under capital lease	1,518,390 (359,455) \$ <u>1,158,935</u>

9. Nonmandatory Transfers

Per Board of Regents Resolution No. 99-10, investments in the amount of \$2 million were withdrawn from the land grant endowment and transferred to current unrestricted funds for the purpose of funding current operations.

10. Contingencies

Litigation

The University is a defendant in several legal actions. The ultimate outcome is presently undeterminable; however, University management is of the opinion that resolution of these matters will not have a material effect on the accompanying financial statements.

General Obligation Bonds

In October 1993, the Government of Guam issued \$175 million general obligation bonds to fund the construction of certain educational facilities with \$28 million being earmarked for certain construction projects at the University of Guam. The University is mandated by Public Law No. 22-19 to establish a bond fund and deposit all tuition revenues in the bond fund. Monthly remittances are transferred by the University of Guam to the Government of Guam's General Fund to cover the University's proportionate share of principal and interest payments of the bond. For the year ended September 30, 1999, monthly payments remitted to the Government of Guam's General Fund of \$2,027,362 are recorded as mandatory transfers out.

Notes to Financial Statements September 30, 1999

10. Contingencies, Continued

Medicare

The Government of Guam and its component units, including the University, began withholding and remitting funds to the U.S. Social Security System for the health insurance component of its salaries and wages effective October 1998. Prior to that date, the Government of Guam did not withhold or remit Medicare payments to the U.S. Social Security System. If the Government is found to be liable for Medicare payments on salaries and wages prior to October 1998, an indeterminate liability could result. It has been the practice of the University and all other component units of the Government of Guam that payment of this health insurance component is optional prior to October 1998. Therefore, no liability for any amount which may ultimately arise from this matter has been recorded in the accompanying financial statements.
